SUBJECT: IAEA SAFEGUARDS: IAEA Request for Continued AFTAC Support  
for Particle Analysis of Environmental Samples

¶1. (SBU) Mission received the letter below requesting continued  
AFTAC support at current contractual levels of 450 samples per  
year.

¶2. (SBU) ACTION REQUEST: Mission strongly recommends continued  
support for this critical safeguards mission and requests guidance  
for responding to IAEA.

BEGIN TEXT OF IAEA LETTER

Under Contract 1998-649, the U.S. Air Force Technical Applications  
Center (AFTAC) provides the IAEA with services of particle analysis  
of environmental samples using a combination of Fission Track  
technique with Thermal Ionization Mass Spectrometry (FT-TIMS). We  
clearly recognize and appreciate that, owing to the US Support  
Programme, the IAEA has the privilege of paying only a small  
fraction of the real cost of this extremely expensive analysis.

AFTAC has the most experience with environmental swipe (ES) samples,  
the largest infrastructure, and an extensive quality control  
programme. It is also a member of the IAEA's Network of Analytical  
Laboratories (NWAL) which accepts highly radioactive samples for  
FT-TIMS analysis.

The IAEA greatly appreciates AFTAC's contribution to the NWAL, and  
would like to reiterate its interest in AFTAC's continued support at  
the current contractual level.

I would also like to express the gratitude of the IAEA for the  
valuable contribution provided by the US Support Programme to the  
IAEA's safeguards efforts.

Nikolai Khlebnikov  
Director  
Division of Technical Support  
Department of Safeguards
